Available in standard white finish or 18 coloured wood grain finishes  
Fully compliant with building regulations

View the full technical specification of this product on our web site.

Bifolding doors featured in this price list are manufactured to a range of standard sizes and are available to open outwards or inwards. Doors are always viewed from the outside.

The colour matched aluminium door threshold is 52mm high and has 3 fitting options:

1. Fitted flush to inside and outside
2. Fitted flush to inside with an optional clip-on aluminium cill to outside
3. Conventionally fitted to floor with optional clip-on aluminium cill to outside

Option 1 or 2 will require 45mm of the threshold to sit below floor level.

Overall door height is measured from underside of bottom track. Specifying optional trickle vents will increase the standard door height by 50mm.

# ALL DOORS VIEWED FROM OUTSIDE

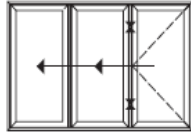

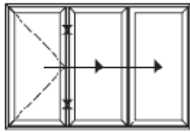

Prices are inclusive of VAT
